Mr. William J. Casey
Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. Casey:

As you are aware, a draft of a National Policy on the Transfer of Scientific and Technical Information has been submitted to your department for review, with comments to be submitted to the executive secretary of the National Security Council by May 30. The June 15, 1984 draft statement is the joint product of an interagency working group that involved the Office of Science and Technology Policy, the Department of Defense, and others.

The scientific community strongly supports the proposed policy and we urge prompt approval of the statement as drafted. Classification of the most sensitive research is the appropriate mechanism to protect national security. Further, we strongly support the continued freedom to conduct and report all other basic research without restriction as an essential means of maintaining this country's scientific and technological leadership.

Sincerely,

Donald Kennedy
